UMass-Amherst Internet Poll of Massachusetts

Field Dates: March 31st - April 6th

Sample: 500 registered Massachusetts voters

The survey was conducted by YouGov America (<http://yougov.com>). YouGov interviewed 674 respondents who were then matched down to a sample of 500 to produce the final dataset. The respondents were matched on gender, age, race, education, ideology, and political interest. YouGov then weighted the matched set of survey respondents to known characteristics of registered voters in Massachusetts from the 2010 American Community Survey using propensity score weighting and then post stratified the weights to party registration statistics from October 2012 (<https://www.sec.state.ma.us/ele/eleenr/enridx.htm>). All analyses were produced using these weights.

The margin of error for registered voters is 5.9%.
